

Dr. Nazim Abdel Aati

Senior Consultant in Developmental & Behavioral Pediatrics

Director, Reenaz Specialized Center for Child Health

MBBS, DPH, MSc (London), MRCPCH, FRCPCH, FFPH

Dr. Nazim Abdel Aati is an internationally recognized expert in developmental and behavioral pediatrics, with over two decades of clinical and leadership experience in the United Kingdom and Qatar. He is the founder and Director of Reenaz Specialized Center for Child Health, where he leads a dedicated team providing comprehensive, multidisciplinary care for children with developmental challenges and special educational needs and disabilities (SEND).

Dr. Nazim holds a distinguished academic and professional portfolio that includes a Master of Science from the University of London, a Diploma in Public Health, membership and fellowship from the Royal College of Paediatrics and Child Health (FRCPCH) and the fellowship of the UK Faculty of Public Health (FFPH)—the latter awarded through distinction for his exceptional contributions to global child health.

A licensed consultant in both the UK and Qatar, Dr. Nazim has undergone extensive international training in the diagnosis and treatment of Autism Spectrum Disorder (ASD), attention deficit hyperactivity disorders (ADHD) and other neurodevelopmental conditions. His work emphasizes early intervention, family-centered care, and community-based solutions that bridge health, education, and social sectors.

Through Reenaz Center, Dr. Nazim is pioneering integrated models of care that support children and adolescents with diverse developmental needs. His vision focuses on delivering high-quality, evidence-based services that are inclusive, accessible, and culturally sensitive.

He is also a leading voice in policy and system reform, contributing to research, training, and national strategy on SEND. His work has influenced programs and services in both public and private sectors, advocating for collaboration, inclusion, and dignity for every child.
